DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: the closest prior art found is Kushiya (US 6040521) and Nishitani (US 6023020). Both Kushiya and Nishitani are CIGS (Cu(In, Ga)(S, Se, Te)) solar cells which include an n-type window layer and a transparent conductive oxide in this order on a substrate (figure 1). Nishitani further teaches incorporation of high resistance material at junctions beneath the n-type window layer for reducing leakage current (col. 3, lines 50-60). However, neither Kushiya nor Nishitani teach the presence of an aperture in the n-type window layer. Further search did not reveal a structure including an aperture/pin hole in a window material layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
